

ENVIRONMENTAL POLICY STATEMENT

At Capital Sky Ltd we recognise that our activities are having an impact on our environment, locally, nationally and globally. We understand that it is our responsibility to manage our environmental impact and effectively control our carbon footprint and emissions through effective monitoring and control measures. We strive to operate our Environmental Management System in accordance with the requirements of ISO 14001:2015 to assist the organisation to achieve our commitment and environmental objectives of Carbon Net Zero by 2050. How we will protect our environment and promote sustainability is a fundamental core policy of our organisation and integral part of our overall business strategy and operational activities.

Our aim is to:

Ensure that our environmental impact is an integral part of our overall business strategies, that this developments through time and forms a significant part of our decision-making process and activities.

Promote the conservation and sustainable use of natural resources in an effort to achieve carbon NetZero and to minimise our impact on natural resources.

Introduce effective control measures to reduce the possibility of pollution in all our activities and where possible promote this across our organisation to influence others.

Integrate climate-change considerations into our environmental planning, aspects and impacts assessments, and risk management.

Reduce greenhouse-gas emissions through efficient plant, low-carbon materials, and sustainable procurement.

Adapt our operations to the impacts of climate change, including extreme weather, flooding, and heat exposure.

Promote the conservation and sustainable use of natural resources.

Promote environmental awareness amongst our employees and those working on behalf of the company and to encourage them to work in an environmentally friendly manner by reducing energy usage in all our activities.

Encourage our clients, customers, suppliers and all business associates to reduce overall environmental impact where possible.

To strive for continual improvement in our environmental performance and to, where possible minimise our environmental impact by ensuring our activities have been recorded, assessed and reviewed within an environmental aspects and impacts register.

Where possible reduce waste through re-use and recycling and ensure responsible disposal methods are employed when disposing with unavoidable waste streams. Ensure that waste disposal is carried out by licensed waste management companies and that all waste is carried by waste carriers only and that all documentation is received and retained in accordance with regulatory requirements.

Consider the substitution of materials with more environmentally friendly products and methods, where this is not possible develop appropriate emergency response procedures including adequately trained staff.

Our environmental policy statement will be reviewed at regular intervals. Top management fully accept responsibility for implementing the commitments contained within this policy statement and are committed to leading by example. This policy will be made available to our interested parties, as required and will be reviewed on a regular basis to ensure that it continues to reflect the requirements of the company.
